

# SAFETY DATA SHEET

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

**Product name** : IPS AND AQUAMATIC SYNTHETIC TRANSMISSION OIL  
**Product code** : 24809436  
**Product description** : Lubricant  
**Product type** : Liquid.

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

#### Identified uses

Lubricants

#### Uses advised against

Not applicable.

### 1.3 Details of the supplier of the safety data sheet

AB Volvo Penta  
SE-405 08 Göteborg  
Sweden

+46 (0)31 23 54 60

**e-mail address of person responsible for this SDS** : sds@volvo.com

### 1.4 Emergency telephone number

#### National advisory body/Poison Center

**Telephone number** : Call a POISON CENTER or doctor.

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

**Product definition** : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

#### Hazard pictograms

:

**Signal word** : No signal word.

**Hazard statements** : Toxic to aquatic life with long lasting effects.

#### Precautionary statements

**Prevention** : Avoid release to the environment.

**Response** : Collect spillage.

## SECTION 2: Hazards identification

|                                                                                                                                           |                                                                                                                                                                                                                      |
|-------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>                                                                                                                            | : Not applicable.                                                                                                                                                                                                    |
| <b>Disposal</b>                                                                                                                           | : Dispose of contents and container in accordance with all local, regional, national and international regulations.                                                                                                  |
| <b>Supplemental label elements</b>                                                                                                        | : Contains Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14-tert-alkyl. May produce an allergic reaction. |
| <b>Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles</b> | : Not applicable.                                                                                                                                                                                                    |

### 2.3 Other hazards

|                                                                                                          |                                                                                                   |
|----------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| <b>Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII</b> | : This mixture contains substances that are assessed to be a PBT or a vPvB, refer to Section 3.2. |
| <b>Other hazards which do not result in classification</b>                                               | : None known.                                                                                     |

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures : Mixture

| Product/ingredient name                                                                                                                                                | Identifiers                                                      | %         | Classification                                                                                      | Specific Conc. Limits, M-factors and ATEs                                               | Type    |

### SECTION 3: Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Type

[1] Substance classified with a health or environmental hazard

[2] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

Occupational exposure limits, if available, are listed in Section 8.

### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

|                            |                                                                                                                                                  |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye contact                | : In case of contact with eyes, rinse immediately with plenty of water.                                                                          |
| Inhalation                 | : If inhaled, remove to fresh air.                                                                                                               |
| Skin contact               | : Wash contaminated skin with soap and water.                                                                                                    |
| Ingestion                  | : Get medical attention. If swallowed, do not induce vomiting.                                                                                   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.<br>Refer to protective measures listed in sections 7 and 8. |

#### 4.2 Most important symptoms and effects, both acute and delayed

##### Over-exposure signs/symptoms

|              |                                                                                                        |
|--------------|--------------------------------------------------------------------------------------------------------|
| Eye contact  | : May cause slight transient irritation. ( redness )                                                   |
| Inhalation   | : Long term exposure to high concentrations of oil mist or vapors may cause lung damage.               |
| Skin contact | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
| Ingestion    | : Ingestion may cause gastrointestinal irritation and diarrhea.                                        |

#### 4.3 Indication of any immediate medical attention and special treatment needed

|                     |                                                                                                                                                                          |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Notes to physician  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments | : No specific treatment.                                                                                                                                                 |

### SECTION 5: Firefighting measures

#### 5.1 Extinguishing media

|                                |                                                |
|--------------------------------|------------------------------------------------|
| Suitable extinguishing media   | : Recommended: CO <sub>2</sub> , powders, Foam |
| Unsuitable extinguishing media | : Do not use water jet.                        |

#### 5.2 Special hazards arising from the substance or mixture

|                                       |                                                                                                                                                                                                                                                                                              |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hazards from the substance or mixture | : In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products         | : Decomposition products may include the following materials:<br>nitrogen oxides<br>sulfur oxides<br>phosphorus oxides<br>carbon oxides<br>Aldehyde.                                                                                                                                         |

#### 5.3 Advice for firefighters

## SECTION 5: Firefighting measures

- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Refer to protective measures listed in sections 7 and 8.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

### 6.2 Environmental precautions

- : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

### 6.3 Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations.
- Large spill** : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

### 6.4 Reference to other sections

- : See Section 1 for emergency contact information.  
See Section 8 for information on appropriate personal protective equipment.  
See Section 13 for additional waste treatment information.

## SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Avoid release to the environment. Avoid breathing vapor or mist. Empty containers retain product residue and can be hazardous. Do not reuse container. Avoid contact with eyes, skin and clothing. Do not ingest. May produce or accumulate static electricity with the risk of causing fire and explosion.
- Advice on general occupational hygiene** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Wash contaminated clothing before reuse. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities

Do not store in unlabeled containers. Keep container tightly closed. Keep container in a cool, well-ventilated area. Store in accordance with local regulations.

## SECTION 7: Handling and storage

### 7.3 Specific end use(s)

**Recommendations** : Transmission oil

**Industrial sector specific solutions** : Lubricants

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

#### Occupational exposure limits

No exposure limit value known.

#### Biological exposure indices

No exposure indices known.

**Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.

#### DNELs/DMELs

| Product/ingredient name | Type | Exposure | Value | Population | Effects |
|-------------------------|------|----------|-------|------------|---------|
| Not applicable          |      |          |       |            |         |

#### PNECs

| Product/ingredient name | Compartment Detail | Value | Method Detail |
|-------------------------|--------------------|-------|---------------|
| Not applicable          |                    |       |               |

### 8.2 Exposure controls

**Appropriate engineering controls** : Use only with adequate ventilation. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction.

#### Individual protection measures

**Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

**Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

#### Skin protection

**Hand protection** : For prolonged or repeated handling, use gloves: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** : Provide adequate ventilation.

**Environmental exposure controls** : Do not allow to enter drains or watercourses.

## SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.  
Not available = No data has been shared in the distribution chain nor been possible to identify via available databases.

### 9.1 Information on basic physical and chemical properties

#### Appearance

|                                              |                                                                                         |
|----------------------------------------------|-----------------------------------------------------------------------------------------|
| Physical state                               | : Liquid.                                                                               |
| Color                                        | : Amber.                                                                                |
| Odor                                         | : Petroleum oil                                                                         |
| Odor threshold                               | : Not available.                                                                        |
| Melting point/freezing point                 | : Not available.                                                                        |
| Initial boiling point and boiling range      | : >316°C (>600.8°F)                                                                     |
| Flammability (solid, gas)                    | : Slightly flammable in the presence of the following materials or conditions:<br>heat. |
| Upper/lower flammability or explosive limits | : Lower: 0.9%<br>Upper: 7%                                                              |
| Flash point                                  | : Open cup: >180°C (>356°F) [ASTM D92]                                                  |
| Auto-ignition temperature                    | : Not available.                                                                        |
| Decomposition temperature                    | : Not available.                                                                        |

#### Particle characteristics

Median particle size : Not applicable.

### 9.2.1 Information with regard to physical hazard classes

### 9.2.2 Other safety characteristics

|                     |                  |
|---------------------|------------------|
| Miscible with water | : No.            |
| Evaporation rate    | : Not available. |

## SECTION 10: Stability and reactivity

10.1 Reactivity : No specific test data related to reactivity available for this product or its ingredients.

10.2 Chemical stability : Stable under recommended storage and handling conditions (see Section 7).

10.3 Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid : high temperature

## SECTION 10: Stability and reactivity

**10.5 Incompatible materials** : Reactive or incompatible with the following materials:  
oxidizing materials

**10.6 Hazardous decomposition products** : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## SECTION 11: Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

#### Acute toxicity

| Product/ingredient name                                                                                                                                                | Result    | Species | Dose      | Exposure |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|---------|-----------|----------|
| Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14-tert-alkyl | LD50 Oral | -       | 500 mg/kg | -        |

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

#### Acute toxicity estimates

| Product/ingredient name                                                                                                                                                | Oral (mg/kg) | Dermal (mg/kg) | Inhalation (gases) (ppm) | Inhalation (vapors) (mg/l) | Inhalation (dusts and mists) (mg/l) |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------------|--------------------------|----------------------------|-------------------------------------|
| Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14-tert-alkyl | 500          | N/A            | N/A                      | N/A                        | N/A                                 |

#### Irritation/Corrosion

| Product/ingredient name                                                                                                                                                | Result          | Species | Score | Exposure | Observation |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|---------|-------|----------|-------------|
| Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14-tert-alkyl | Eyes - Irritant | -       | -     | -        | -           |

#### Conclusion/Summary

**Skin** : Based on available data, the classification criteria are not met.

**Eyes** : Based on available data, the classification criteria are not met.

**Respiratory** : Based on available data, the classification criteria are not met.

#### Sensitization

| Product/ingredient name                                                                                                                                                | Route of exposure | Species    | Result      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|------------|-------------|
| Polysulfide, di-tert-Bu                                                                                                                                                | skin              | Guinea pig | Sensitizing |
| Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14-tert-alkyl | skin              | -          | Sensitizing |

#### Conclusion/Summary

## SECTION 11: Toxicological information

**Skin** : Based on available data, the classification criteria are not met. Test data on the allergenic components in the formulation or similar formulations shows that the product is not considered to cause sensitizing effects.

**Respiratory** : Based on available data, the classification criteria are not met.

### Mutagenicity

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

### Carcinogenicity

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

### Reproductive toxicity

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

### Specific target organ toxicity (single exposure)

Not available.

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

| Product/ingredient name                                                                                                        | Result                         |
|--------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| Dec-1-ene, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated distillates (petroleum), hydrotreated heavy paraffinic | ASPIRATION HAZARD - Category 1 |
|                                                                                                                                | ASPIRATION HAZARD - Category 1 |

**Information on the likely routes of exposure** : Not available.

### Potential acute health effects

**Eye contact** : May cause slight transient irritation.

**Inhalation** : Inhalation of oil mist or vapors at elevated temperatures may cause respiratory irritation.

**Skin contact** : Defatting to the skin.

**Ingestion** : Ingestion may cause gastrointestinal irritation and diarrhea.

### Symptoms related to the physical, chemical and toxicological characteristics

**Eye contact** : May cause slight transient irritation. ( redness )

**Inhalation** : Long term exposure to high concentrations of oil mist or vapors may cause lung damage.

**Skin contact** : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

**Ingestion** : Ingestion may cause gastrointestinal irritation and diarrhea.

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

#### Long term exposure

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

### Potential chronic health effects

Not available.

## SECTION 11: Toxicological information

|                              |                                                                                                                                                                                                                                                                                                                                        |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 11.2 Information on other hazards

#### 11.2.1 Endocrine disrupting properties

Not applicable.

#### 11.2.2 Other information

Not available.

## SECTION 12: Ecological information

This product shows a low bioaccumulation potential.

This material is toxic to aquatic life with long lasting effects.

Oils are in general persistent in the environment. Upon release the oil spreads on the soil or water surface and can affect the area for a long time.

### 12.1 Toxicity

| Product/ingredient name | Result                         | Species | Exposure |
|-------------------------|--------------------------------|---------|----------|
| Polysulfide, di-tert-Bu | Acute EC50 63 mg/l Fresh water | Daphnia | 48 hours |

**Conclusion/Summary** : This material is toxic to aquatic life with long lasting effects.

### 12.2 Persistence and degradability

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|-------------------------|-------------------|------------|------------------|
| Polysulfide, di-tert-Bu | -                 | -          | Not readily      |

### 12.3 Bioaccumulative potential

| Product/ingredient name                                                      | LogP <sub>ow</sub> | BCF              | Potential    |
|------------------------------------------------------------------------------|--------------------|------------------|--------------|
| Polysulfide, di-tert-Bu<br>PHOSPHOROTHIOIC<br>ACID, O,O,O-TRIPHENYL<br>ESTER | 5.6<br>6.47        | -<br>842 to 2194 | High<br>High |

### 12.4 Mobility in soil

**Soil/water partition coefficient (K<sub>oc</sub>)** : Not available.

**Mobility** : Non water-soluble liquid

### 12.5 Results of PBT and vPvB assessment

| Product/ingredient name                     | PBT              | P         | B         | T         | vPvB | vP  | vB |
|---------------------------------------------|------------------|-----------|-----------|-----------|------|-----|----|
| PHOSPHOROTHIOIC ACID, O,O,O-TRIPHENYL ESTER | SVHC (Candidate) | Specified | Specified | Specified | No   | N/A | No |

### 12.6 Endocrine disrupting properties

## SECTION 12: Ecological information

Not applicable.

### 12.7 Other adverse effects

No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

#### Product

**Methods of disposal** : Waste must be disposed of in accordance with federal, state and local environmental control regulations.

**Hazardous waste** : Yes.

#### European waste catalogue (EWC)

| Waste code | Waste designation                           |
|------------|---------------------------------------------|
| 13 02 06*  | synthetic engine, gear and lubricating oils |

#### Packaging

**Methods of disposal** : Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

**Special precautions** : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## SECTION 14: Transport information

|                                        | ADR/RID                                                                                  | ADN                                                                                      | IMDG                                                                                      | IATA                                                                                       |

#### Additional information

**ADR/RID** : This product is not regulated as a dangerous good when transported in sizes of ≤5 L or ≤5 kg, provided the packagings meet the general provisions of 4.1.1.1, 4.1.1.2 and 4.1.1.4 to 4.1.1.8.

#### Tunnel code (-)

**ADN** : This product is not regulated as a dangerous good when transported in sizes of ≤5 L or ≤5 kg, provided the packagings meet the general provisions of 4.1.1.1, 4.1.1.2 and 4.1.1.4 to 4.1.1.8.

**IMDG** : This product is not regulated as a dangerous good when transported in sizes of ≤5 L or ≤5 kg, provided the packagings meet the general provisions of 4.1.1.1, 4.1.1.2 and 4.1.1.4 to 4.1.1.8.

## SECTION 14: Transport information

**IATA** : This product is not regulated as a dangerous good when transported in sizes of ≤5 L or ≤5 kg, provided the packagings meet the general provisions of 5.0.2.4.1, 5.0.2.6.1.1 and 5.0.2.8.

**14.6 Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**14.7 Maritime transport in bulk according to IMO instruments** : Not available.

## SECTION 15: Regulatory information

**15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture**

### EU Regulation (EC) No. 1907/2006 (REACH)

#### Annex XIV - List of substances subject to authorization

##### Annex XIV

None of the components are listed.

##### Substances of very high concern

| Intrinsic property                                                                    | Ingredient name                             | Status    | Reference number | Date of revision |
|---------------------------------------------------------------------------------------|---------------------------------------------|-----------|------------------|------------------|
|  PBT | PHOSPHOROTHIOIC ACID, O,O,O-TRIPHENYL ESTER | Candidate | -                | -                |

#### Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

| Product/ingredient name | % | Designation [Usage] |
|-------------------------|---|---------------------|
| No listed substance     |   |                     |

**Labeling** : Not applicable.

#### Other EU regulations

**Industrial emissions (integrated pollution prevention and control) - Air** : Listed

**Industrial emissions (integrated pollution prevention and control) - Water** : Not listed

**Explosive precursors** : Not applicable.

#### Ozone depleting substances (1005/2009/EU)

Not listed.

#### Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

#### Persistent Organic Pollutants

Not listed.

#### Seveso Directive

This product is controlled under the Seveso Directive.

##### Danger criteria

| Category |
|----------|
| E2       |

#### National regulations

## SECTION 15: Regulatory information

### International regulations

#### Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

#### Montreal Protocol

Not listed.

#### Stockholm Convention on Persistent Organic Pollutants

Not listed.

#### Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

#### UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

**15.2 Chemical Safety Assessment** : No Chemical Safety Assessment has been carried out for this mixture by the supplier.

## SECTION 16: Other information

Indicates information that has changed from previously issued version.

**Abbreviations and acronyms** : ATE = Acute Toxicity Estimate  
 CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]  
 DMEL = Derived Minimal Effect Level  
 DNEL = Derived No Effect Level  
 EUH statement = CLP-specific Hazard statement  
 N/A = Not available  
 PBT = Persistent, Bioaccumulative and Toxic  
 PNEC = Predicted No Effect Concentration  
 RRN = REACH Registration Number  
 SGG = Segregation Group  
 vPvB = Very Persistent and Very Bioaccumulative

### Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification          | Justification      |
|-------------------------|--------------------|
| Aquatic Chronic 2, H411 | Calculation method |

### Full text of abbreviated H statements

|      |                                                       |
|------|-------------------------------------------------------|
| H302 | Harmful if swallowed.                                 |
| H304 | May be fatal if swallowed and enters airways.         |
| H317 | May cause an allergic skin reaction.                  |
| H319 | Causes serious eye irritation.                        |
| H410 | Very toxic to aquatic life with long lasting effects. |
| H411 | Toxic to aquatic life with long lasting effects.      |
| H412 | Harmful to aquatic life with long lasting effects.    |

### Full text of classifications [CLP/GHS]

|                   |                                                 |
|-------------------|-------------------------------------------------|
| Acute Tox. 4      | ACUTE TOXICITY - Category 4                     |
| Aquatic Chronic 1 | AQUATIC HAZARD (LONG-TERM) - Category 1         |
| Aquatic Chronic 2 | AQUATIC HAZARD (LONG-TERM) - Category 2         |
| Aquatic Chronic 3 | AQUATIC HAZARD (LONG-TERM) - Category 3         |
| Asp. Tox. 1       | ASPIRATION HAZARD - Category 1                  |
| Eye Irrit. 2      | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2 |
| Skin Sens. 1      | SKIN SENSITIZATION - Category 1                 |
| Skin Sens. 1B     | SKIN SENSITIZATION - Category 1B                |

**Date of issue/ Date of revision** : 5/23/2025

**Version** : 2

**Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878**
